# Cloud Readiness Assessment and Roadmap

NextPerimeter.com // 888-286-4816

# IS YOUR ORGANIZATION PREPARED FOR THE CLOUD?

Everybody is talking about the cloud. Smart companies are using the cloud to lower prices, become more agile, and boost resiliency. Most companies are currently utilizing some form of cloud computing or services across IaaS, PaaS, or SaaS cloud service models. Organizations are resorting to the cloud for crucial aspects of their service delivery instead of counting on local on-premise software, servers and virtual machines. With Next Perimeter, we'll collaborate with you to create a cloud movement roadmap to help your organization accept the cloud.

## SERVICES RENDERED

- Reduce IT costs
- Increase flexibility, agility & automation
- Advanced performance & scalability
- Refresh aging infrastructure
- Enhance DR & business continuity
- Harden your cybersecurity posture
- Increase collaboration & productivity
- Enable access anywhere, anytime

Next Perimeter's Cloud Readiness Assessment provides a thorough analysis of your IT environment to create a cloud optimized roadmap for applications, servers, and workloads. Our cloud architects work with your team to understand your infrastructure, identify opportunities and vulnerabilities to design the ideal cloud environment to meet your goals.

| DISCOVER | ANALYZE | RECOMMEND |
|---|---|---|

**Collect** information via cloud discovery meeting and questionnaires
- We discuss business objectives and desired outcomes to identify the best options available
- We'll review IT infrastructure, apps, workloads, and resources

**Scan** network
- Complete a non-intrusive network scan, vulnerability scan, and run network assessment tools
- Inventory network, applications, services, servers, and workloads

**Analyze** current environment
- IT infrastructure, apps, services and workloads
- Cloud readiness across applications, security, business continuity/disaster recovery, system performance, and scalability.

**Identify** and prioritize cloud migration opportunities
- On-premise workloads
- Applications & business line software
- Architectural dependencies

**Develop** recommendations
- Migration roadmap
- Architecture
- Security remediation strategies

**Recommend** your cloud journey strategy opportunities
- Workloads and cloud architecture
- Review project timelines, risk mitigation, and ROI projections in plain english so everyone understands expected business outcomes

## YOUR CLOUD JOURNEY ROADMAP WITHOUT JARGON

## Cloud Solution Summary

Includes overview of scope and objectives, current environment recap, cloud recommendations, roadmap, risk mitigation plan, and budgetary estimates & solutions.

## Technical Documentation

Includes detailed analysis of servers, workloads, and migration options, and high-level and detailed-level cloud design options.

# YOUR CLOUD READINESS ASSESSMENT WILL ANSWER

## 01 What are cloud migration priorities based on business needs and impact?

We'll determine priorities based on business impact, resource requirement, and risk based on your assessment.

## 02 What applications, workloads and services would benefit us the most if moved to the cloud?

We work with you to identify specific applications and workloads that should be migrated.

## 03 What cloud adoption strategy is best and what risks are associated?

Review options for migration, such as "lift and shift" versus refactoring, and their associated risks to your business.

## 04 What is the optimal cloud adoption strategy for our busines? What at our risks?

Next Perimeter will define the optimal migration roadmap, milestones, and timing.

Businesses seeking to embark on their cloud transformation journey need a partner with the operational maturity and deep expertise to gain the most value when moving to the cloud. Next Perimeter is your partner, we're a leading Managed IT and Cloud Solution provider ready to help your organization reach your full potential in the cloud.

Since 2006, we've helped thousands of small and medium-sized businesses leverate IT as a competitive weapon. Contact us today to learn how we can help your business streamline operational IT, eliminate downtime, and reduce IT overhead.

# WHAT SETS US APART?

### It All Starts in the Cloud

Your .com is what ties your business to the web, allowing you to get your email and collaborate online. Whether you're using Google Workspace or Microsoft 365, **Next Perimeter** has you covered. Your team can leverage our certified experts for matters concerning your email deliverability, DNS records, licensing concierge, and more.

### Your Team and Workstations are Fully Covered

When your team logs into your corporate environment today, what types of protections exist? **Next Perimeter**, by default, deploys endpoint security and hardware monitoring to every workstation that we manage, ensuring productivity is at an all-time high. Your team will enjoy unlimited round-the-clock support for everyday issues ranging from authentication to hiccups with their equipment.

### Battle-Tested SOPs

Whether we will handle all of your IT, or collaborate with an internal team, our procedures have been perfected against millions of business scenarios. Our system has been trained to adapt to each customer as their organizations evolve.

### Future-Proofed for Compliance

We know you want your cybersecurity to be reliable, predictable, functional, and cost-effective - that's why we've simplified cyber so it's back-of-mind. By signing up for Essentials, you've created a predictable path toward future compliance needs as our agents can fulfill virtually all requirements they might ask for with simple per-user/device pricing.
