SECURITY ASSESSMENT

NextPerimeter.com // 888-286-4816

Are you worried about the security, integrity, and availability of your organization's sensitive data?

01 WHY IS A SECURITY ASSESSMENT IMPORTANT?

A security assessment provides stakeholders with actionable insights to improve your company's cybersecurity posture and will help you:

1. Objectively assess the overall resilience of your cybersecurity posture.

2. Identify security gaps and vulnerabilities across your network and systems

3. Identify internal threats and employee risk areas that need improvement

4. Prioritize vulnerabilities that need to be remediated

5. Mitigate security risks from internal and external threats

02 OUR SECURITY EXPERTS WILL PERFORM THE FOLLOWING ACTIVITIES

- Conduct interviews and review your current cybersecurity strategy

- Complete a vulnerability scan and penetration test on your network to identify possible vulnerabilities and risk exposures.

- Document and provide a security report on your overall cybersecurity posture, complete with an executive summary, recommendations, and detailed remediation strategies, in plain English everyone can understand.

03 GET IN-DEPTH ANALYSIS FROM OUR COMPREHENSIVE ASSESSMENTS

Next Perimeter is the leading provider of IT Managed Services for small and medium-sized businesses. Our security assessments go beyond simple malware and virus scans. We can dissect all aspects of your security posture, from your network framework to your everyday users, and make concrete, cost-effective recommendations for strengthening your defenses.

WHAT SETS US APART?

It All Starts in the Cloud

Your .com is what ties your business to the web, allowing you to get your email and collaborate online. Whether you're using Google Workspace or Microsoft 365, **Next Perimeter** has you covered. Your team can leverage our certified experts for matters concerning your email deliverability, DNS records, licensing concierge, and more.

Your Team and Workstations are Fully Covered

When your team logs into your corporate environment today, what types of protections exist? **Next Perimeter**, by default, deploys endpoint security and hardware monitoring to every workstation that we manage, ensuring productivity is at an all-time high. Your team will enjoy unlimited round-the-clock support for everyday issues ranging from authentication to hiccups with their equipment.

Battle-Tested SOPs

Whether we will handle all of your IT, or collaborate with an internal team, our procedures have been perfected against millions of business scenarios. Our system has been trained to adapt to each customer as their organizations evolve.

Future-Proofed for Compliance

We know you want your cybersecurity to be reliable, predictable, functional, and cost-effective - that's why we've simplified cyber so it's back-of-mind. By signing up for Essentials, you've created a predictable path toward future compliance needs as our agents can fulfill virtually all requirements they might ask for with simple per-user/device pricing.
