NEXT PERIMETER

Modern Desktop Playbook

A Guide to Eliminating Legacy IT Headaches & Embracing a Secure, Effortless Work Experience

Why Rethink Traditional IT?

Your IT setup shouldn't be slowing you down. Yet, many businesses are still relying on outdated, insecure, and inefficient IT infrastructure.

Common Pain Points:
- ❌ Slow, outdated devices
- ❌ VPNs that frustrate remote users
- ❌ Security gaps from unmanaged devices
- ❌ IT stuck in reactive mode

Still remembering multiple passwords? If this sounds familiar, it's time to rethink IT.

Next Perimeter's Modern Desktop Experience fixes all of this.

1 Cloud Identity & Device Management
No servers needed.

2 SASE (Secure Access Service Edge)
VPN replacement for seamless access.

3 Zero Trust Security
Verifies every device, user, and access attempt.

4 Pre-configured, secure workstations
No IT setup delays.

5 Automated Security & Compliance
Patching, encryption, SIEM monitoring.

The 5-Step Migration Plan

1 Assess IT Setup and Identify Risks

2 Standardize and Secure Devices

3 Deploy SASE & Eliminate VPN Headaches

4 Enforce Zero Trust Security Policies

5 Automate IT Security and Compliance

We don't just recommend the Modern Desktop Experience— we implement it.

✅ Pre-configured, secure workstations shipped to your employees
✅ Zero Trust security model with automated access control
✅ 24/7 security monitoring, SIEM integration, & lifecycle management
✅ No VPNs, no servers, no IT headaches
